

MATH 2705W—Technical Writing in Mathematics

Assignment 1 Peer Revision Feedback Sheet

Author: Gordon Chen

Peer reviewer: JOHN ROONEY

Final Draft Rubric Checklist

Check each required attribute of the paper below - mark with Y or N for yes or no. For any N's marked, include comment(s) suggesting changes to help your classmate earn points for that component. Note: you will need to look at your peer's LaTeX code as well as their compiled paper. Use the back of the sheet for additional comments and recommendations.

Required Attribute	Y/N	Comments
LaTeX used with minimal errors, used <code>\title</code> , <code>\author</code> , and <code>\section</code>	Y	
Clickable <code>\hyperref</code> links	Y	
Used environments correctly	Y	
Correct definition of $\mathbb{Q}$	Y	
Correct definition of irrational	Y	
Correct definition of "lowest terms"	Y	
Proof in prose: sentences/paragraphs	N	use too many symbols.
Explained 2 required conclusions (§3)	Y	
Historical remarks & other proof(s) in §4	Y	could add in more historical proofs.
Bibliography and references correctly formatted	Y	
Clear, concise, correct English (e.g., sentences give context to notation)	Y	
Clear definitions and proof	Y	
Two pages long	N
